Meter to Cash

Smart metering · AMI · AMR · Multi-source data management

A solution by WiserMeter

Overview & Key Numbers

 **20**
Tenants

 **2,949**
Properties

 **199,151**
Metered Units

 **285,611**
Meters

 **20M+**
Readings / Month

System Functions

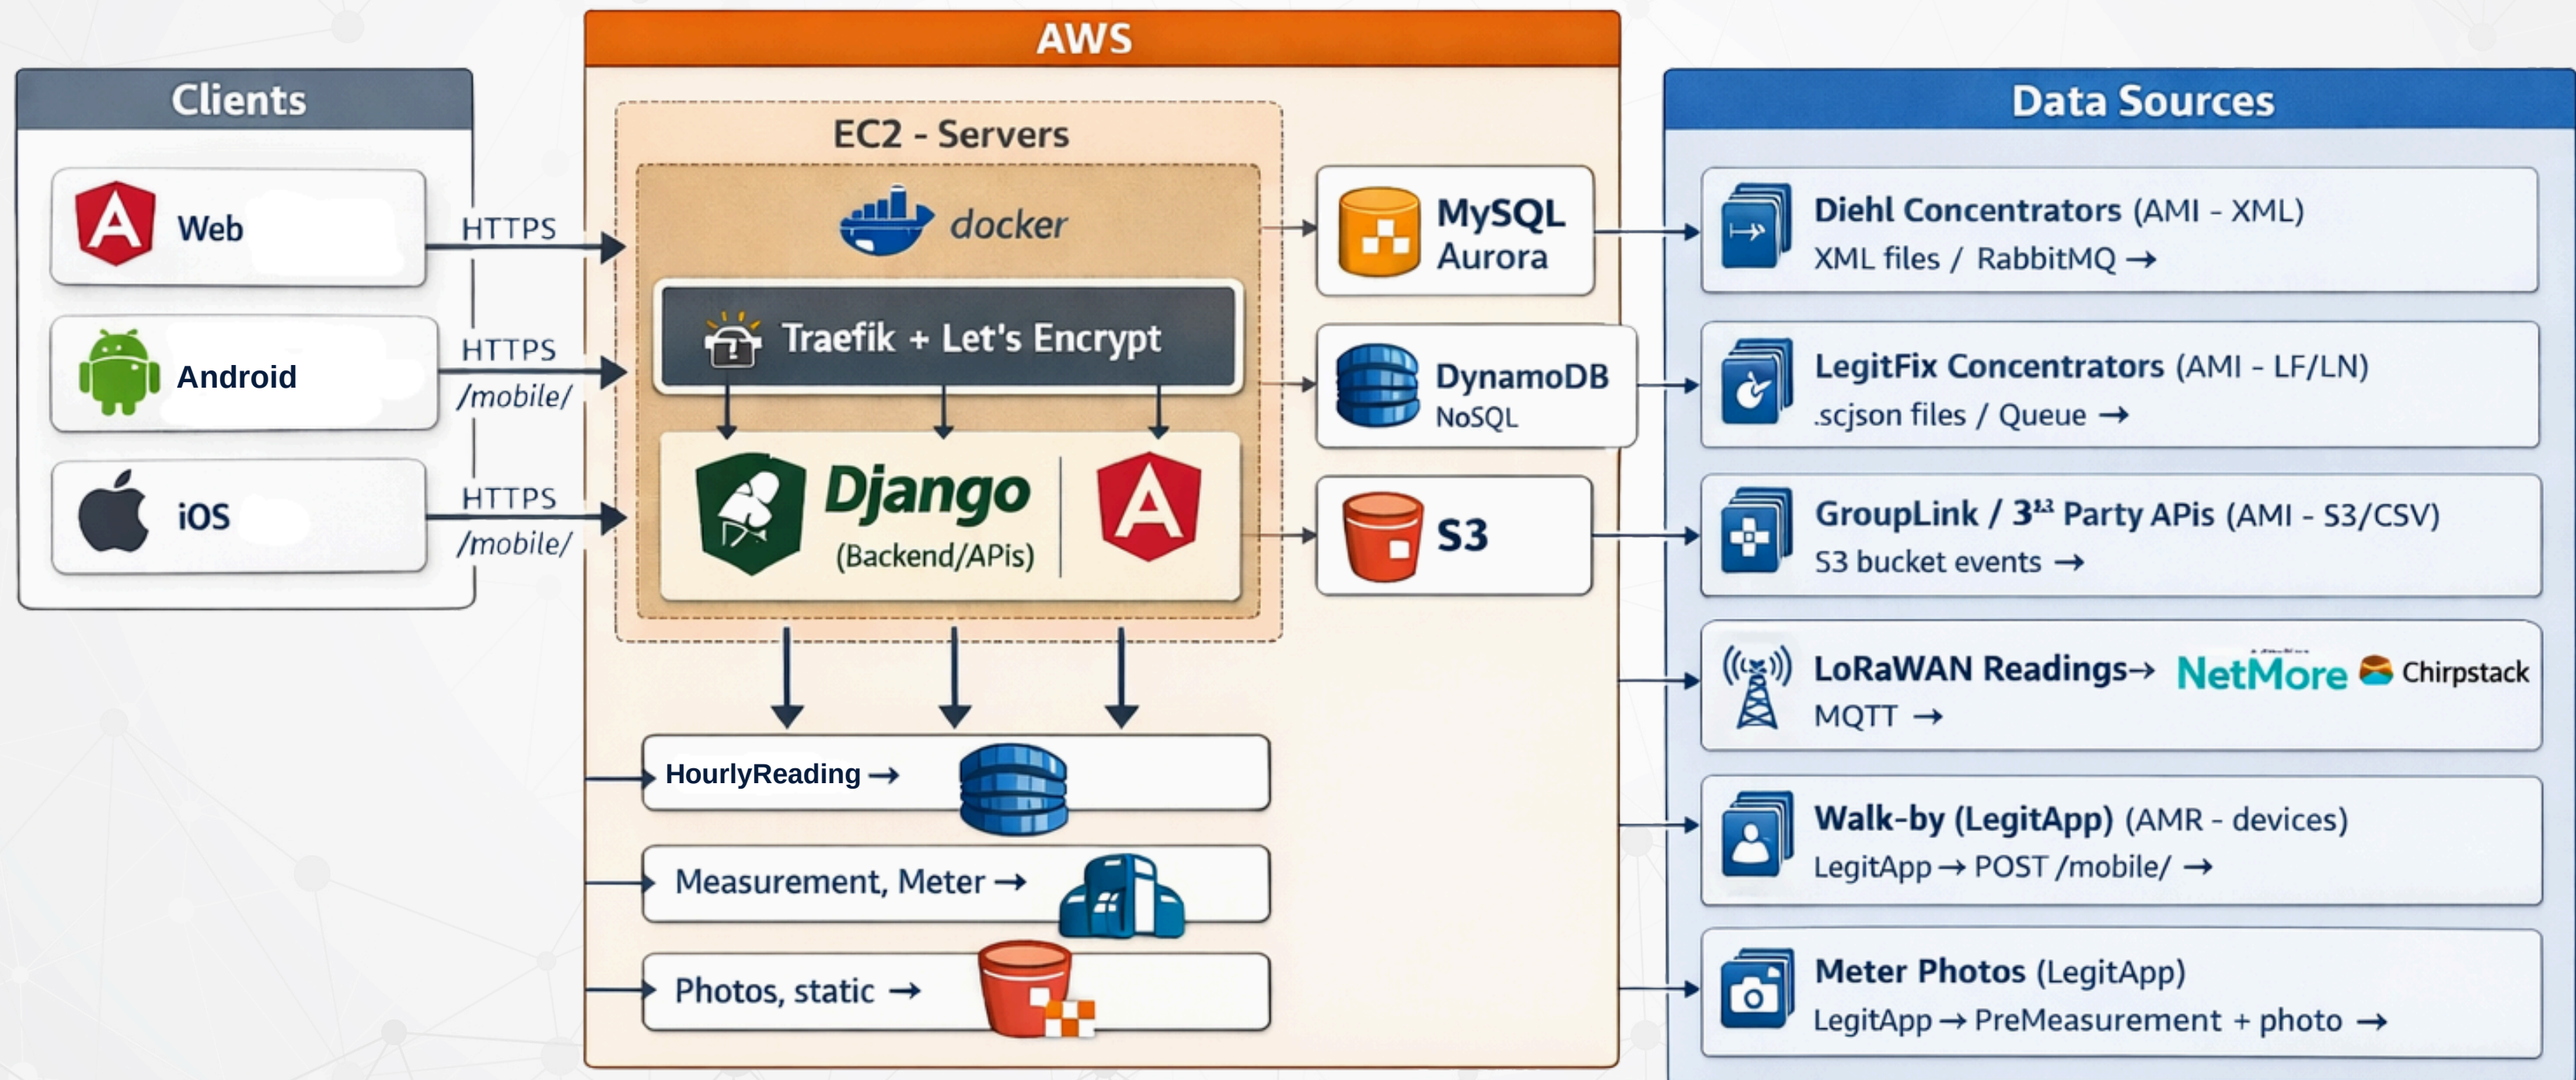

- Consumption data capture (AMI, AMR, photo).
- Billing cycle close & invoicing.
- Per-unit charge calculation.
- Integration with property management systems.
- REST API, MQTT for third parties.
- W-MBus/OMS, LoRaWAN, BLE, NBIoT integration ou compatibility.

Business Value

- Reduce losses with real-time consumption visibility.
- End-to-end automation from reading to billing.
- Half of readings carry minute-by-minute granularity.
- **Unified platform:** water, energy, and gas.

Technical Architecture

Cloud-native, event-driven, and built for scale.

CONCLUSION

One unified platform for intelligent metering

- Production system **processing 20M+ readings/month** with high availability.
- **Granular visibility:** hourly and per-minute data for precise operational decisions.
- **Open architecture:** REST API, MQTT, and property management integrations.
